PROFESSIONAL SUMMARY

Full stack developer with close to three years on the MERN stack, plus freelance WordPress and WooCommerce work since 2022. I take client projects from the brief through to deployment and maintenance, and have delivered live sites for clients in Pakistan, the UAE and the United States. Studying for a BS in Computer Science at Riphah alongside full-time work. Open to remote and on-site roles.

TECHNICAL SKILLS

Frontend: React, JavaScript (ES6+), TypeScript, HTML5, CSS3, Tailwind CSS, Bootstrap 5, Responsive Design
Backend: Node.js, Express.js, MongoDB, Mongoose, REST APIs, JWT Authentication, Role-Based Access Control
CMS / Platforms: WordPress, WooCommerce, Elementor, Brilliant Directory
Tools & Workflow: Git, GitHub, Vite, npm, Postman, ESLint, Netlify, cPanel

PROFESSIONAL EXPERIENCE

MERN Stack Developer | Sani IT-Consultant, Lahore
Jan 2024 - Present

- Build React front ends with reusable components and Context API state management across client applications.
- Write and maintain Node.js and Express.js REST APIs over MongoDB, covering schema design, query optimisation and fixing slow endpoints.
- Implement JWT authentication with role-based route protection for admin, editor and standard user roles.
- Cut first-load bundle weight on multi-page builds by moving inner routes behind React.lazy and code splitting.
- Debug and refactor existing codebases, and hand over documented work to clients and the internal team.

Web Development Intern | Sani IT-Consultant, Lahore
Jun 2023 - Dec 2023

- Frontend internship working in HTML5, CSS3, JavaScript and React.
- Contributed to live client websites under a senior developer's review.
- Customised WordPress themes and configured plugins to match client requirements.

Freelance Web Developer | Self-employed
Jan 2022 - Present

- Built and delivered custom WordPress websites for clients in Pakistan, the UAE and the United States.
- Delivered WooCommerce stores end to end: catalogue setup, payment gateways, shipping rules and order handling.
- Set up Brilliant Directory platforms for membership and listing-based businesses.
- Handled hosting, DNS, migrations and post-launch fixes directly with clients, including ongoing maintenance.

SELECTED PROJECTS

- catchy-storefront - React 19 e-commerce storefront: persistent cart, nested category routing and checkout flow.
- sani-corporate-website - Seven-page React 19 site with route-level code splitting and hash-aware scroll restoration.
- nexora - Electron and React desktop app in TypeScript running four AI agents against the local shell.
- thetimesofnewyork.com - News and publishing site with category sections, article workflow and admin dashboard (React).
- uforuae.com - Business directory and listings portal for a UAE client, with search by category and location.
